

CARPET TILES
MOHAWK CARPET TILES
 Mohawk Group

Meet the only carpet with rapidly renewable ingredients. SmartStrand® Contract modular and broadloom flooring is the biosource breakthrough that provides superior stain resistance, unmatched design flexibility and unsurpassed colorfastness—all with one-of-a-kind environmental advantages. Specify the fiber that exceeds expectations. Specify SmartStrand made with Dupont™ Sorona®, and sacrifice nothing.

Created to be Sustainable

37% renewably sourced ingredients by weight, replacing petrobased materials found in other carpets.
Extended product life cycle and recyclable at the end of the products life.*
30% reduced manufacturing energy and emissions
LEED Credit MR 6.0 compliant

Engineered to Perform

Inherent stain resistance
95% of stains clean easily with water
Requires fewer chemicals, lower maintenance
Resists fading and is colorfast to harsh cleaning agents.
Long-term soil protection
Exceptional durability, even in the harshest environment

Designed to be Beautiful

Unmatched flexibility, uncompromised performance
Color starts and stays vibrant
Unlimited dye methods for a brilliant color spectrum
Finally a beautiful source for biosource

* Mohawk, in partnership with DuPont, has demonstrated SmartStrand Contract is able to be recycled back into carpet and diverse end use products. For any new product, particularly given SmartStrand Contract's extended life, a time lag occurs prior to entering the recovery stream. As the recovery supply chain matures, broad based carpet-to-carpet recycling will be initiated.
